

# Chrome™ Guided Smile

## Your Chrome workflow guide

Quoris3D > Services > Chrome guided smile

NOT JUST FASTER, BETTER.

# Digital, full-arch guided reconstruction from Chrome and Quoris3D.

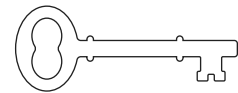

Offer your patients a life-changing experience with virtually-preplanned dental implants and teeth in a one-day procedure.

Chrome delivers anchored bite verification, anchored bone reduction, anchored site drilling, accurate anchored provisionalisation, and a method for transferring all surgical and restorative information for the final restorative conversion phase.

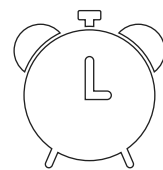

Good planning means better execution, less guesswork, less stress, simpler restorative steps, greater treatment success - and therefore less litigation.

**Happier patients,  
happier dentists.**

**Open implant  
surgery to a wider  
audience.**

**Dramatically  
reduce chair  
time.**

# CHROME Guided Surgery service options

## Combi Smile - Guided Surgery package

Full case planning and the production of 2 surgical guides.

The first is for bone reduction / reshaping and the second is for implant placement.

Using the 'CHROME' metal-based 3D printed guides offers the clinician a solid and accurate base from which to confidently place dental implants.

No flexure and no chance of breakage. This confidence speeds up surgery and reduces stress.

## Chrome Surgery

Full surgical planning, production of surgical guides including bone reduction, implant placement and prosthetic conversion.

Includes the provisional bridge which is fitted via the conversion kit. This means that you don't need to have a technician present, reducing time and cost.

## Chrome Surgery Plus **Save £495**

The complete CHROME package.

From full surgical planning and support right through to the delivery of the final Zirconia bridge.

With you every step of the way.

# A guide to submitting your Chrome Surgery case

1.
  - Select your case; edentulous or partially dentate.

---

2.
  - If you are unsure and want to 'test' to see if your case is suitable, please select our FREE case selection service at [quoris3d.com/case-selection-service](https://quoris3d.com/case-selection-service).
  - Here, we evaluate the case and give advice on what further information we may need.

---

3.
  - Once you have selected your case, choose the service you require from [quoris3d.com/chrome-surgery-products](https://quoris3d.com/chrome-surgery-products) and upload the required information.
  - If you do not have an STL file (digital impression) you may send us impressions and models which we will digitise for you.

---

4.
  - Within 10 days you will be invited to an online planning meeting.
  - Here, you will confirm the details of the case and sign off with us.

---

5.
  - 2 hours after sign off you will receive an email confirming the design and an implant component list which you will use to order the required parts from your implant rep.

---

6.
  - The case goes into production.

---

7.
  - 12-14 days later you will receive your Chrome case box which has all you need inside to complete your case.
